#### DETAILED ACTION

Page 2

## Claim Objections

- 1. The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).
- 2. Misnumbered claims 21-37 have been renumbered 19-35.

### Drawings

- 3. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. No new matter should be entered.
- 4. For instance, Figure 1 is described in the specification (page 5, lines 31-33) as "a schematic overview of a preferred

۵,

Page 3

embodiment of a device according to the invention". However, no additional claimed steps or structure of the invention are provided. In its current form, Figure 1 should be labeled as "Prior Art" as it appears to only show well known electron scattering from a coating (see also description in the specification (page 6, lines 13-27)).

- 5. Similarly, Figure 8 is described in the specification (page 6, lines 11-12) as "a schematic representation of a neural network for determining precompensated patterns". In its current form, Figure 8 should be labeled as "Prior Art" as it appears to only show well known neural network interconnections.
- 6. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

#### Allowable Subject Matter

7. Claims 19-34 (formerly 21-36) are allowed.

Art Unit: 2121

# Claim Rejections - 35 USC § 112

8. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

9. Claim 35 (formerly 37) is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Specifically, claim 35 (formerly 37) recites in step c): "smearing the precompensated pattern again with the smearing function ...". However, no previous mention is made in the claim regarding smearing the precompensated pattern initially. Further, the phrase "the smearing function" has no antecedent basis. Correction is required.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Douglas M. Shute whose telephone number is (703) 305-5615. The examiner can normally be reached on M-F 9:30 AM - 6:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Anthony Knight can be reached on (703) 308-3179. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
